

Covers and equipment  
for industrial machinery

# Product Presentation

CATÁLOGO TÉCNICO

## FROM BRAZIL TO THE WORLD

FW do Brasil shares high-tech, high-quality products with the world.

**Technology**

**Quality**

**Innovation**

**Results**

## We are FW do Brasil.

A company that for two decades has been offering innovative solutions in protection and equipment for industrial machinery.

We are always looking for resources that offer satisfactory results, combining new technologies with techniques and materials for all those who trust and choose our brand.

We have seen that **INNOVATION AND TECHNOLOGY** are part of our DNA, and are increasingly present in our daily lives. We will continue with our mission of providing functionality and alternatives to our clients, considering the needs of each project, surprising and exceeding their expectations.

**HUT-TYPE  
TELESCOPIC COVER**

**2-AXIS JOINTED  
TELESCOPIC COVER**

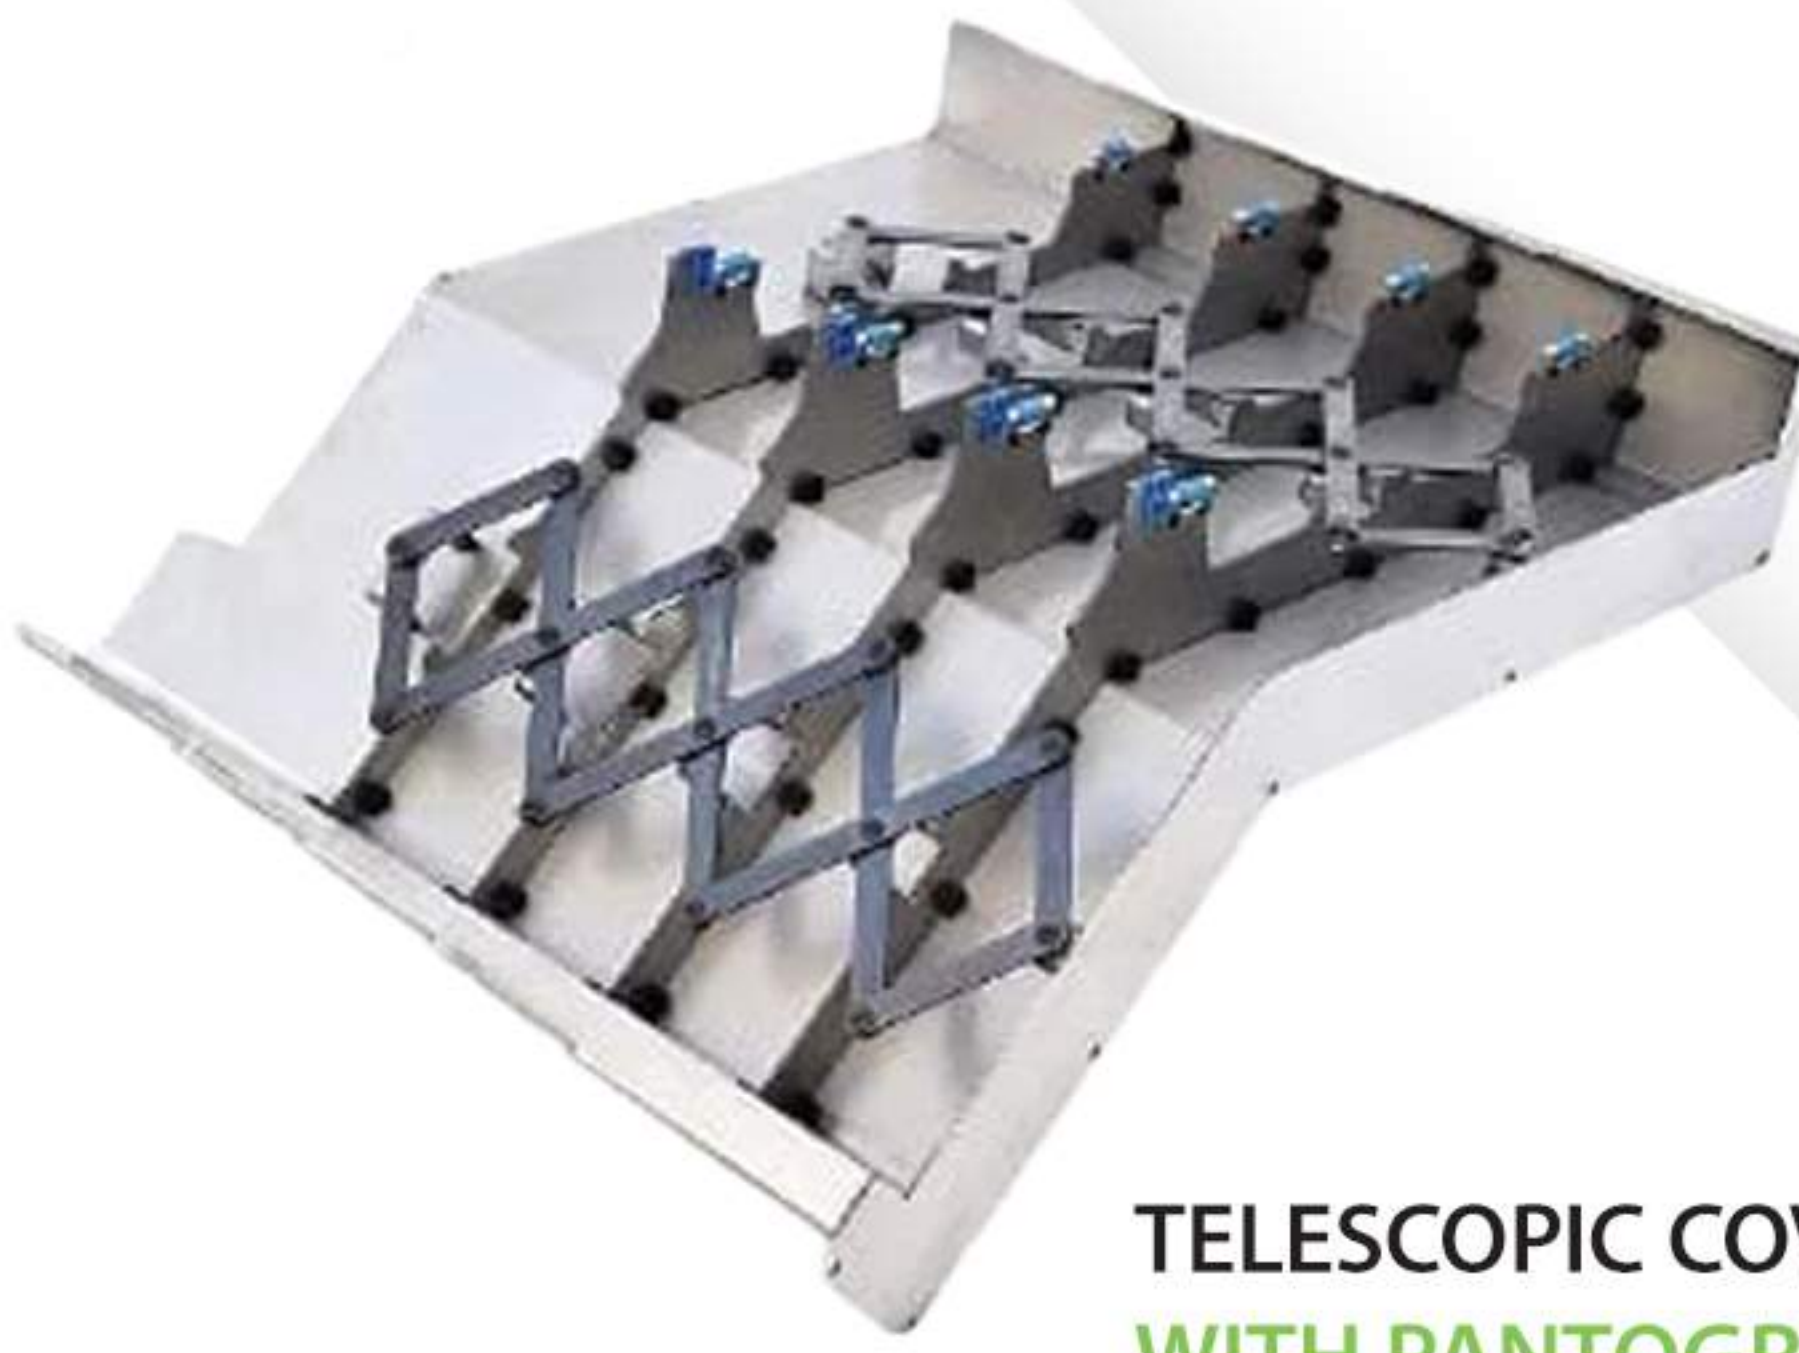

**TELESCOPIC COVER  
IRREGULAR Z SHAPE**

**RECTANGULAR TELESCOPIC  
COVER**

## TELESCOPIC COVER

Ideal for protecting busbars, linear guides and spindles from chips in heavy-duty machines. Manufactured in any shape and material.

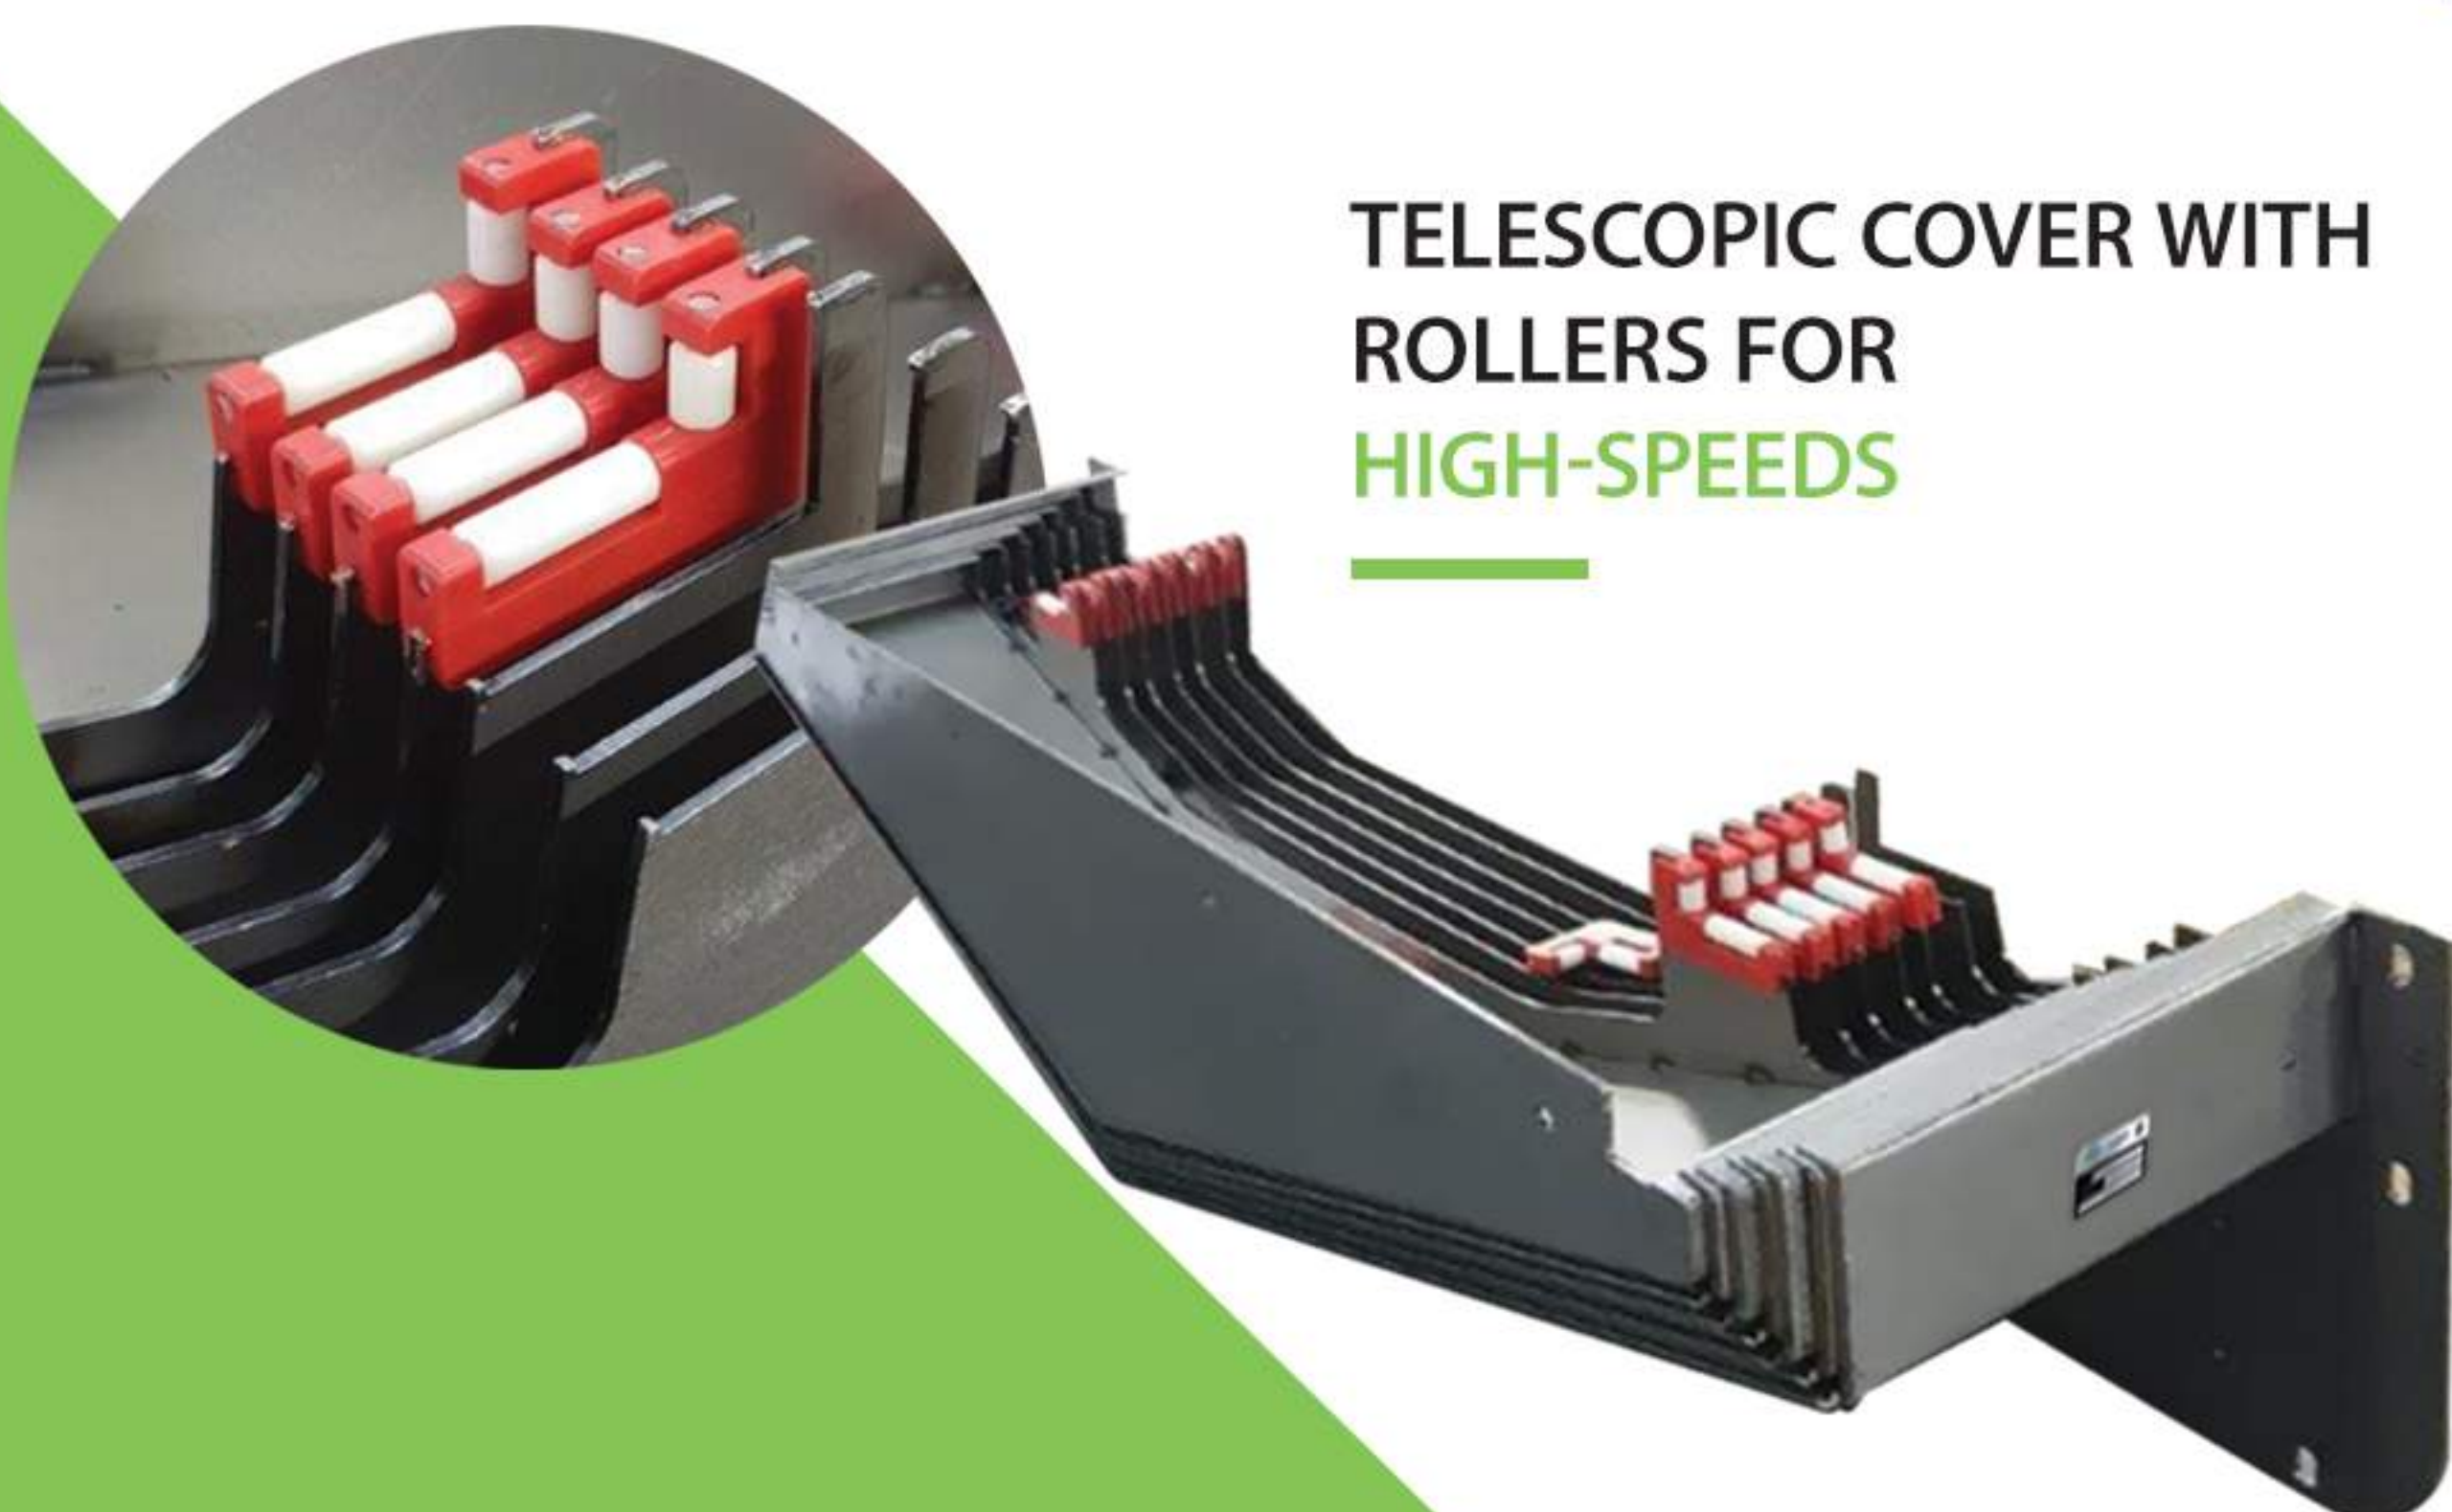

**TELESCOPIC COVER  
WITH PANTOGRAPH**

**TELESCOPIC COVER  
FOR HEAVY MACHINERY**

**TELESCOPIC  
SPRING**

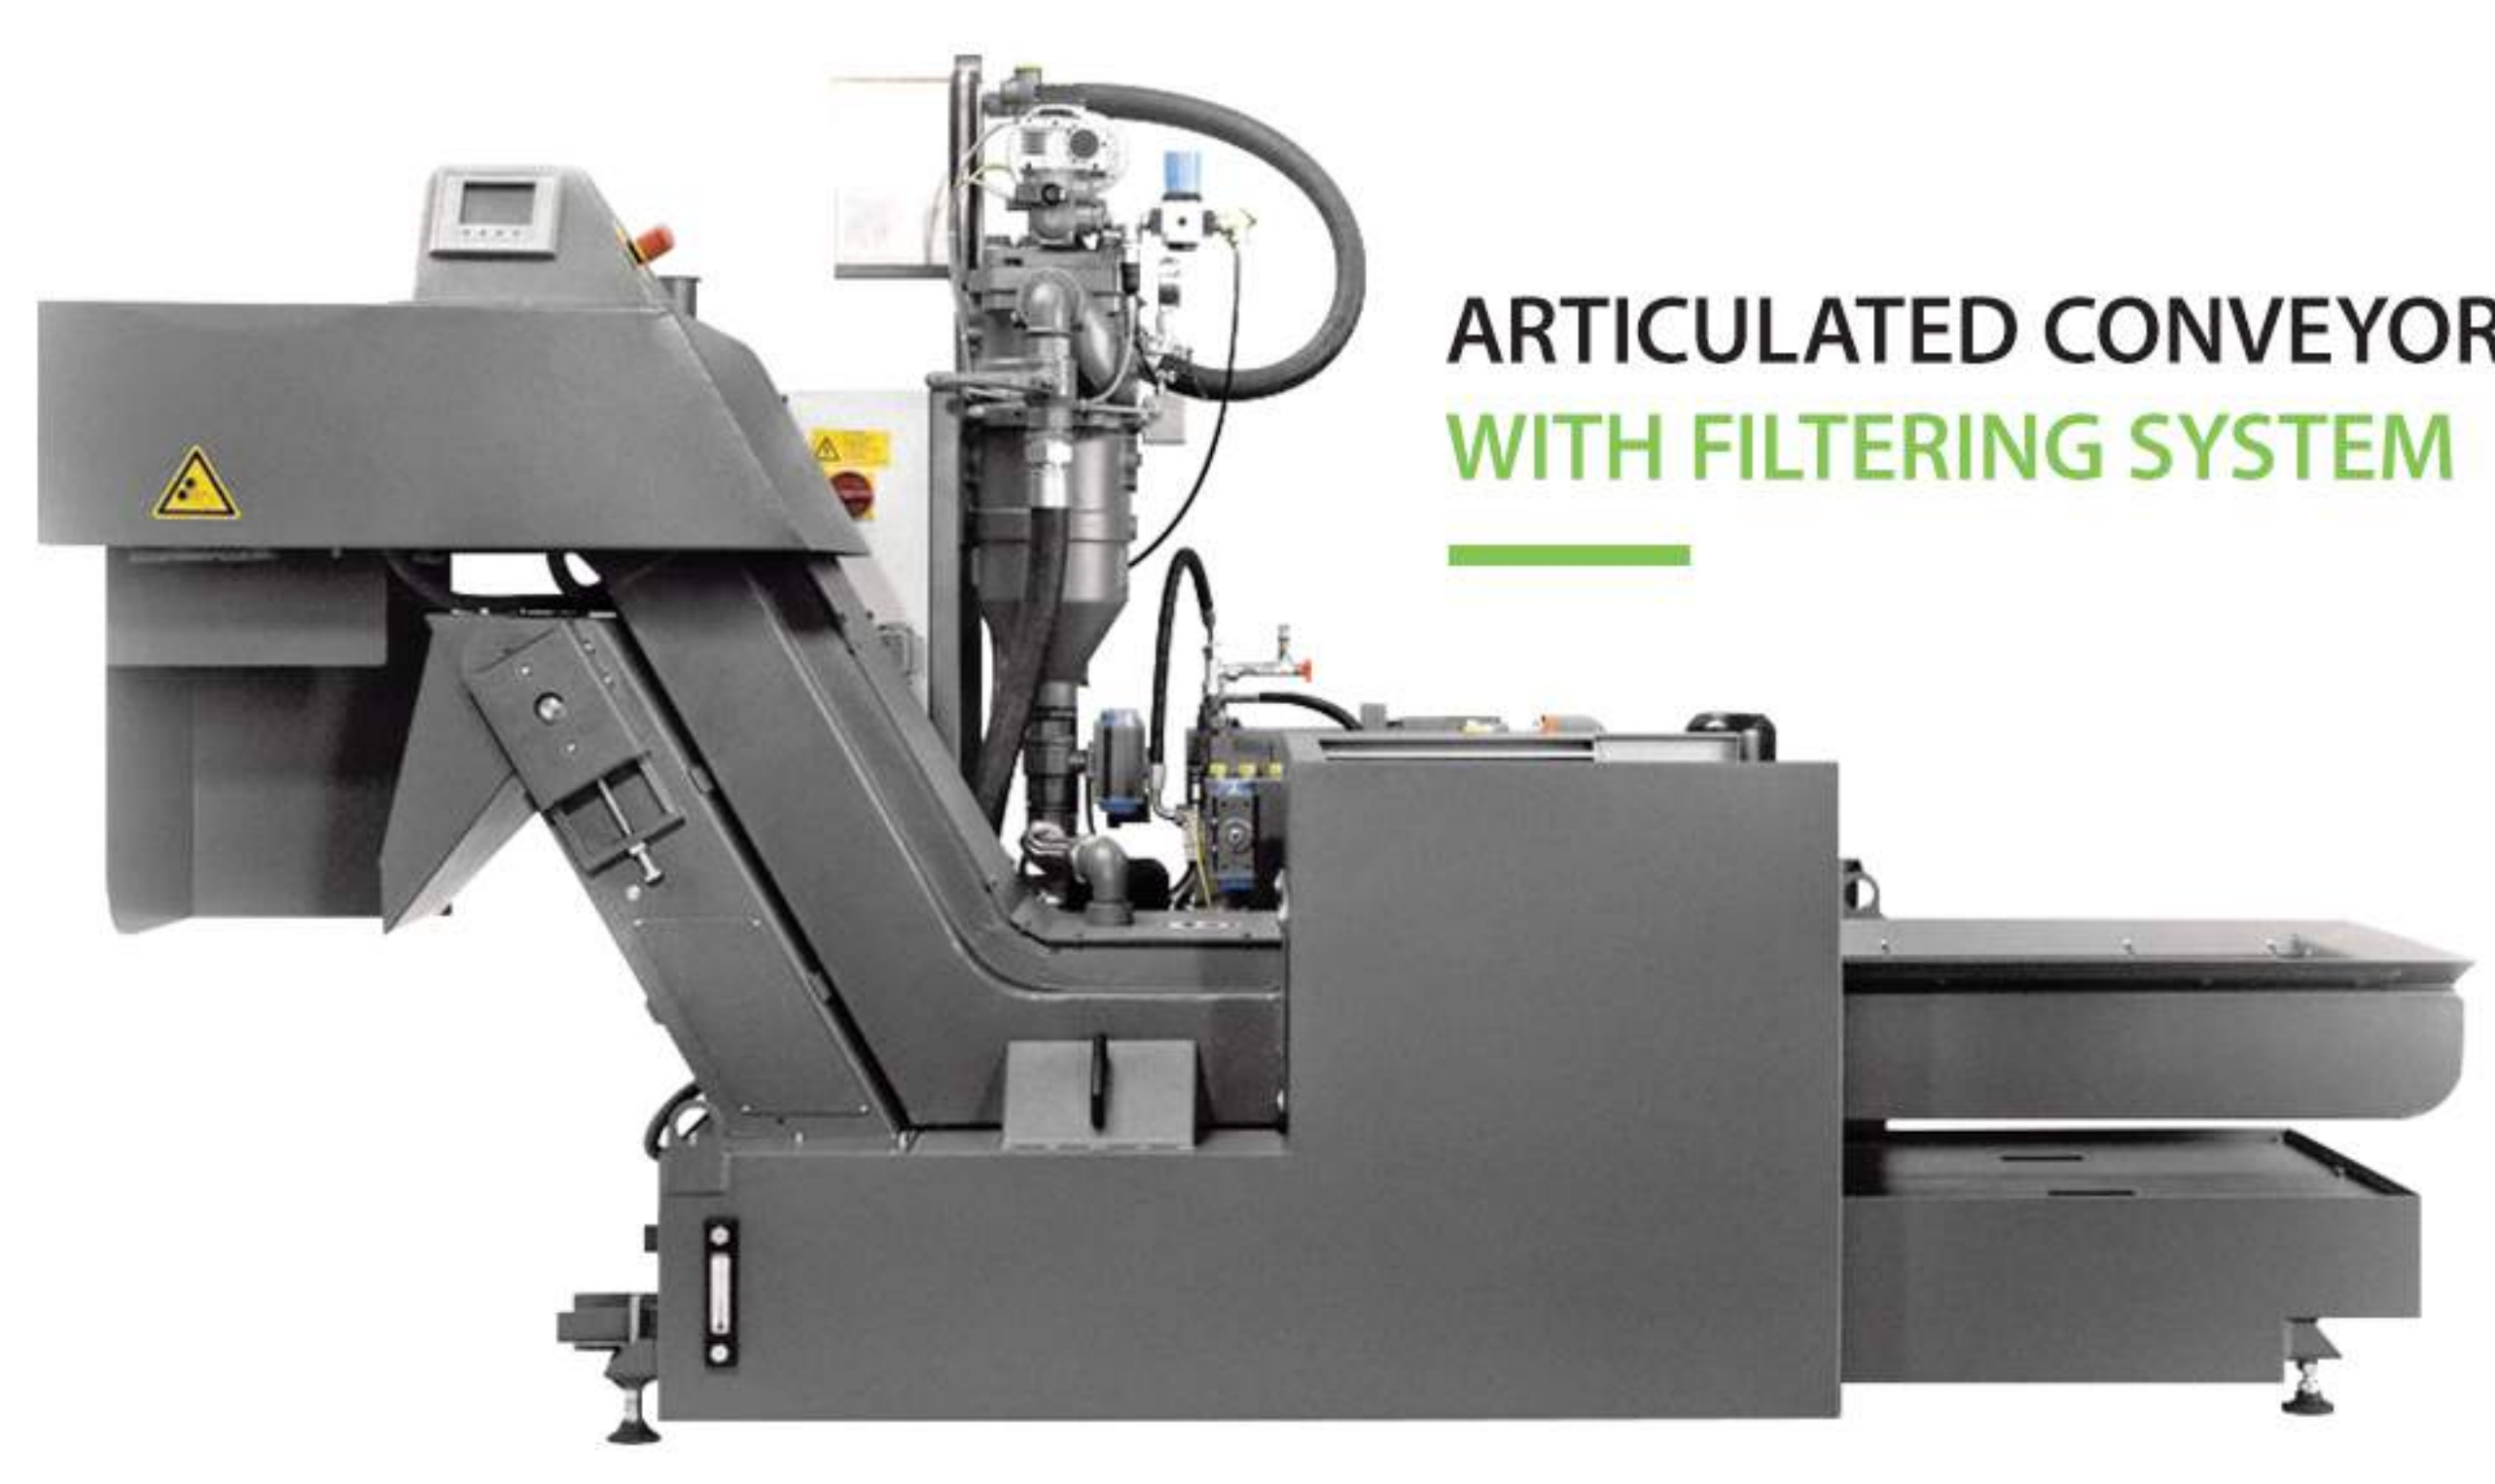

**TELESCOPIC COVER WITH  
ROLLERS FOR  
HIGH-SPEEDS**

**TELESCOPIC  
TUBE**

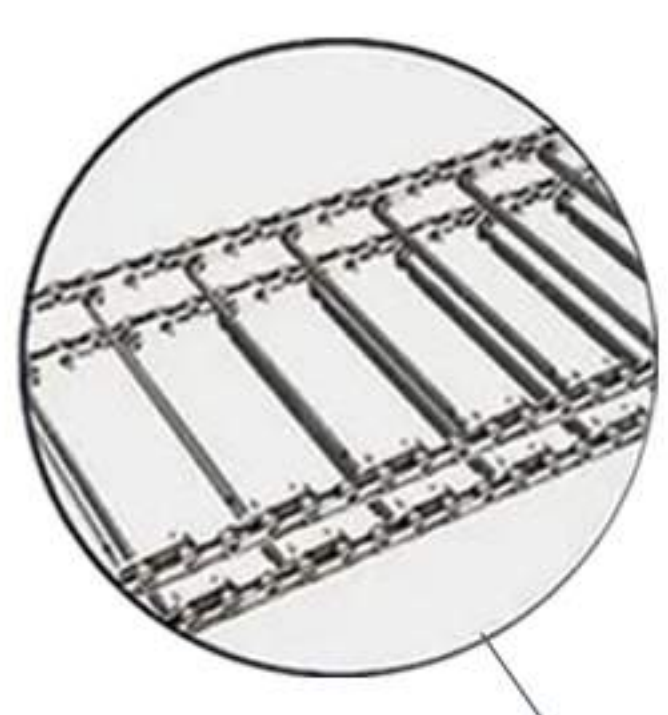

**MAGNETIC CONVEYOR**

**ARTICULATED CONVEYOR WITH FILTERING SYSTEM**

**DRAG CHAIN CONVEYOR**

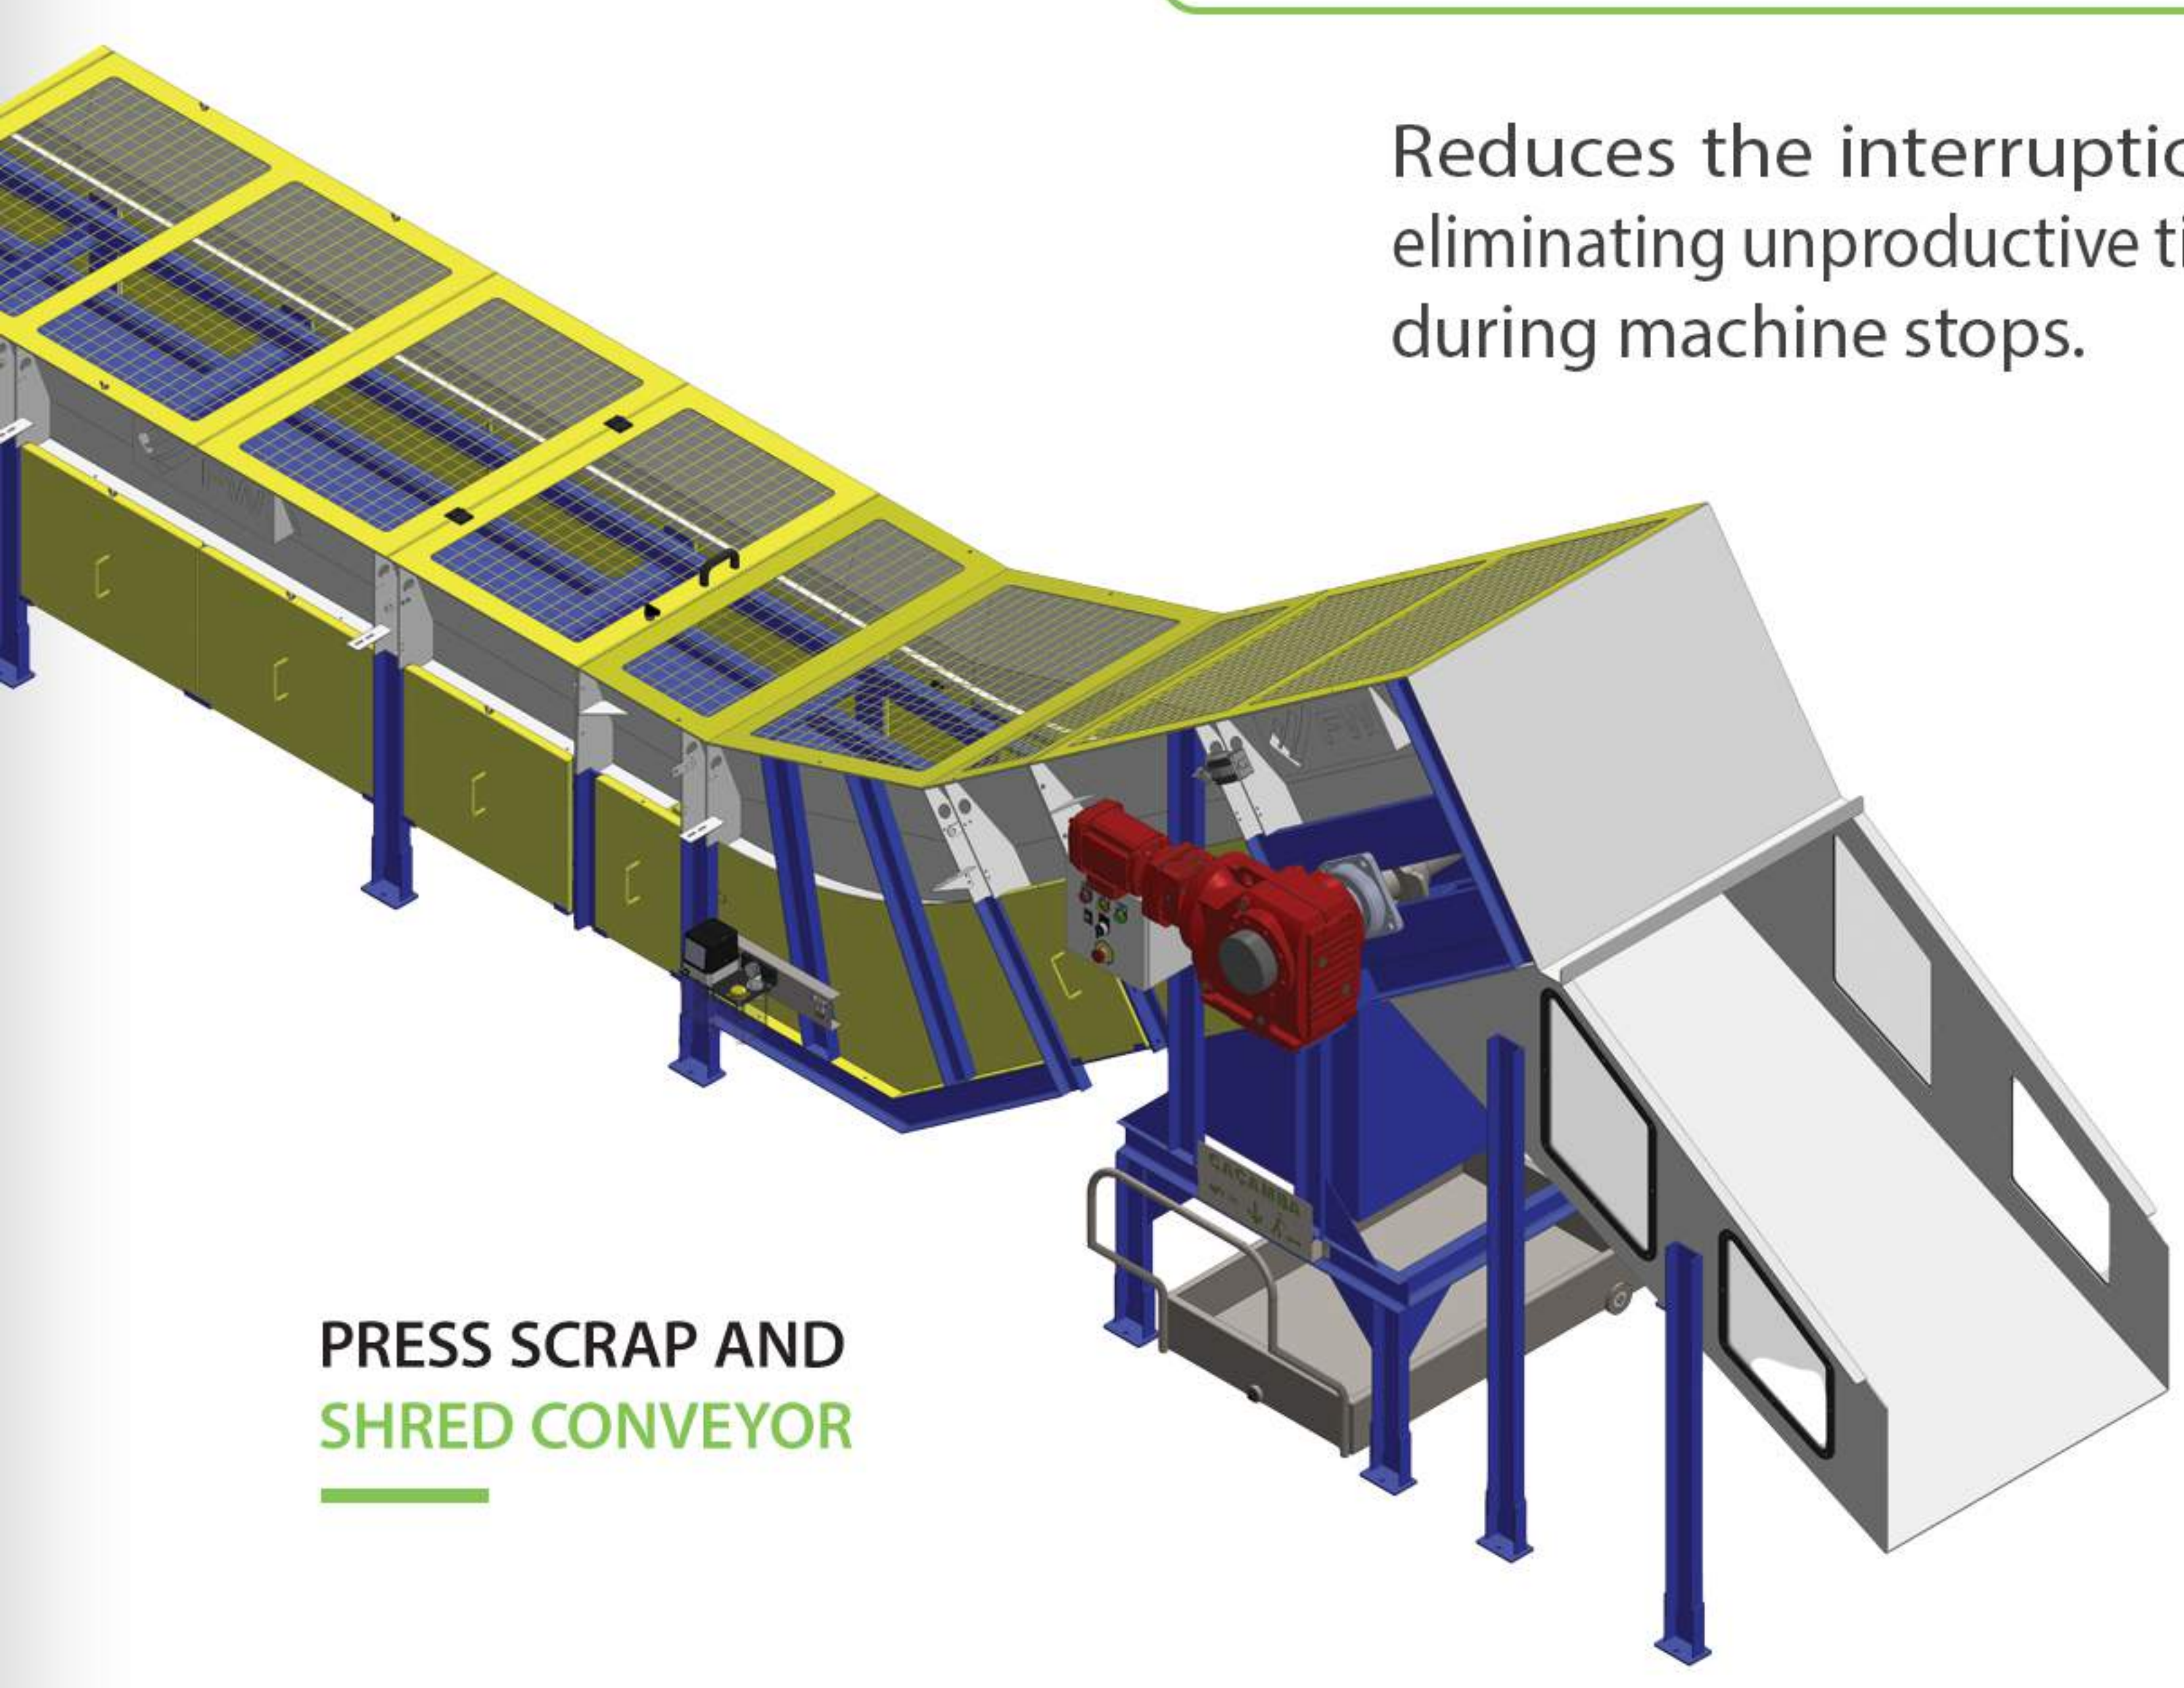

**ARTICULATED CONVEYOR**

# CHIP CONVEYOR

Reduces the interruption of machine tool cycles, eliminating unproductive time and labor for chip removal during machine stops.

**PRESS SCRAP AND SHRED CONVEYOR**

**CHIP BUCKET**

**SYNCHRONIZED CHAIN PARTS CONVEYOR**

**AUTOMATIC ROTATING CHUTE**

**BELT CONVEYOR**

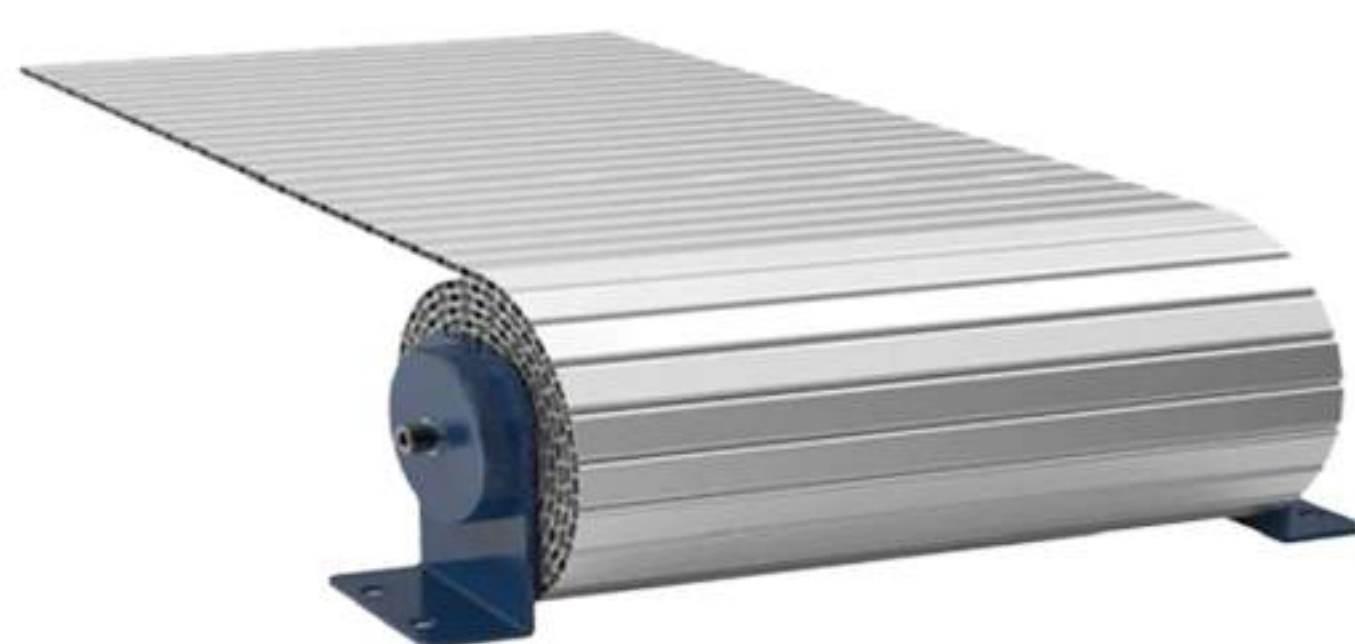

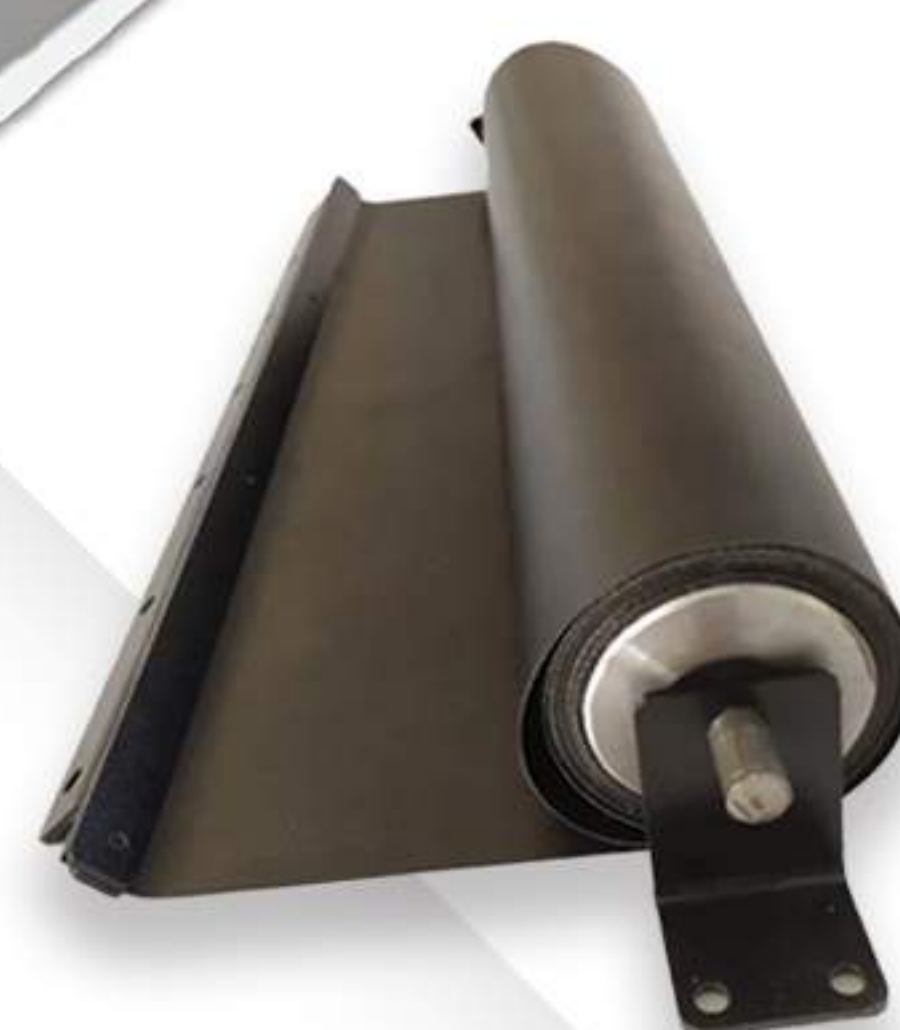

ALUMINUM TREADMILL  
WITH AND WITHOUT  
MOTORIZATION

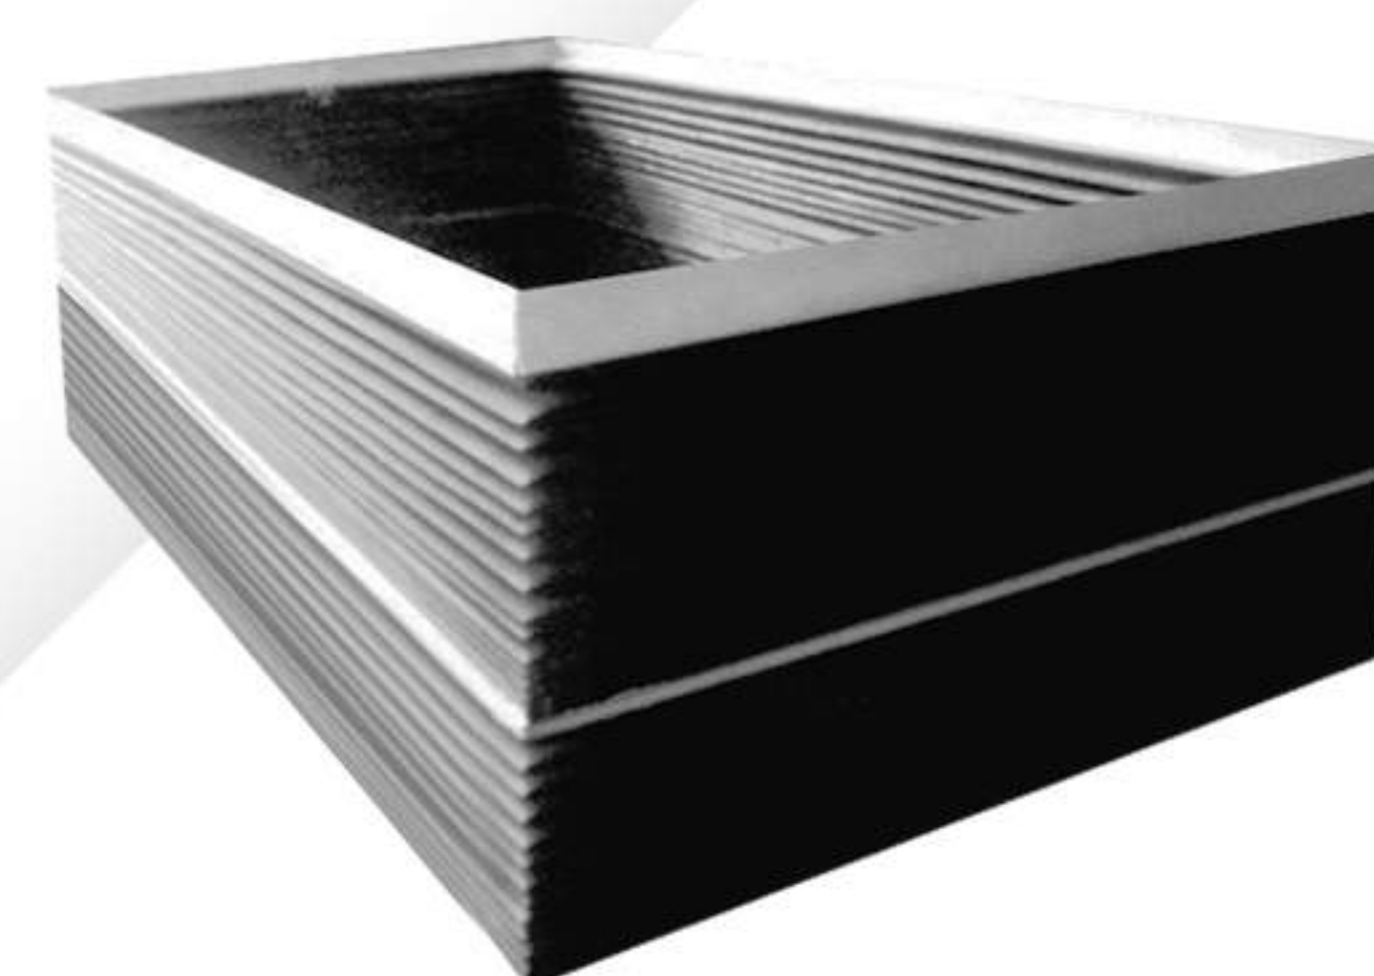

BELLOW COVER WITH  
STAINLESS STEEL BLADES

## BELLOW COVERS

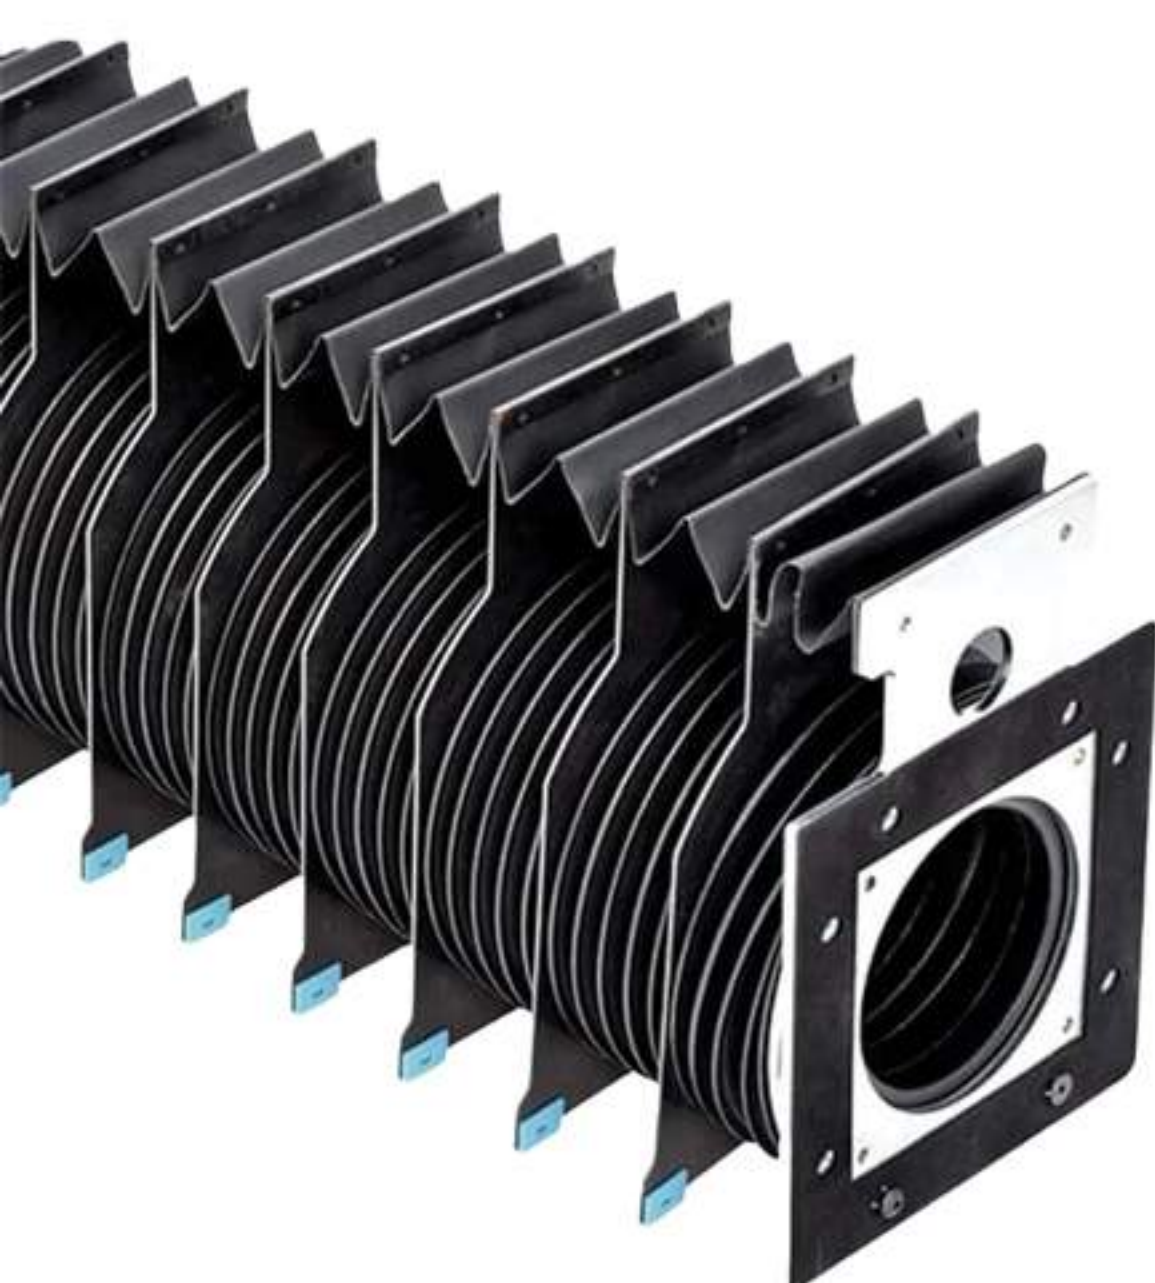

Made in different shapes and materials. For protecting busbars, guides, rods and spindles.

CURTAIN  
ROLLER

BELLOW COVER  
FOR LIFTING TABLES

CYLINDRICAL  
BELLOW COVER

BELLOW COVERS  
FOR LASER-CUTTING  
MACHINES

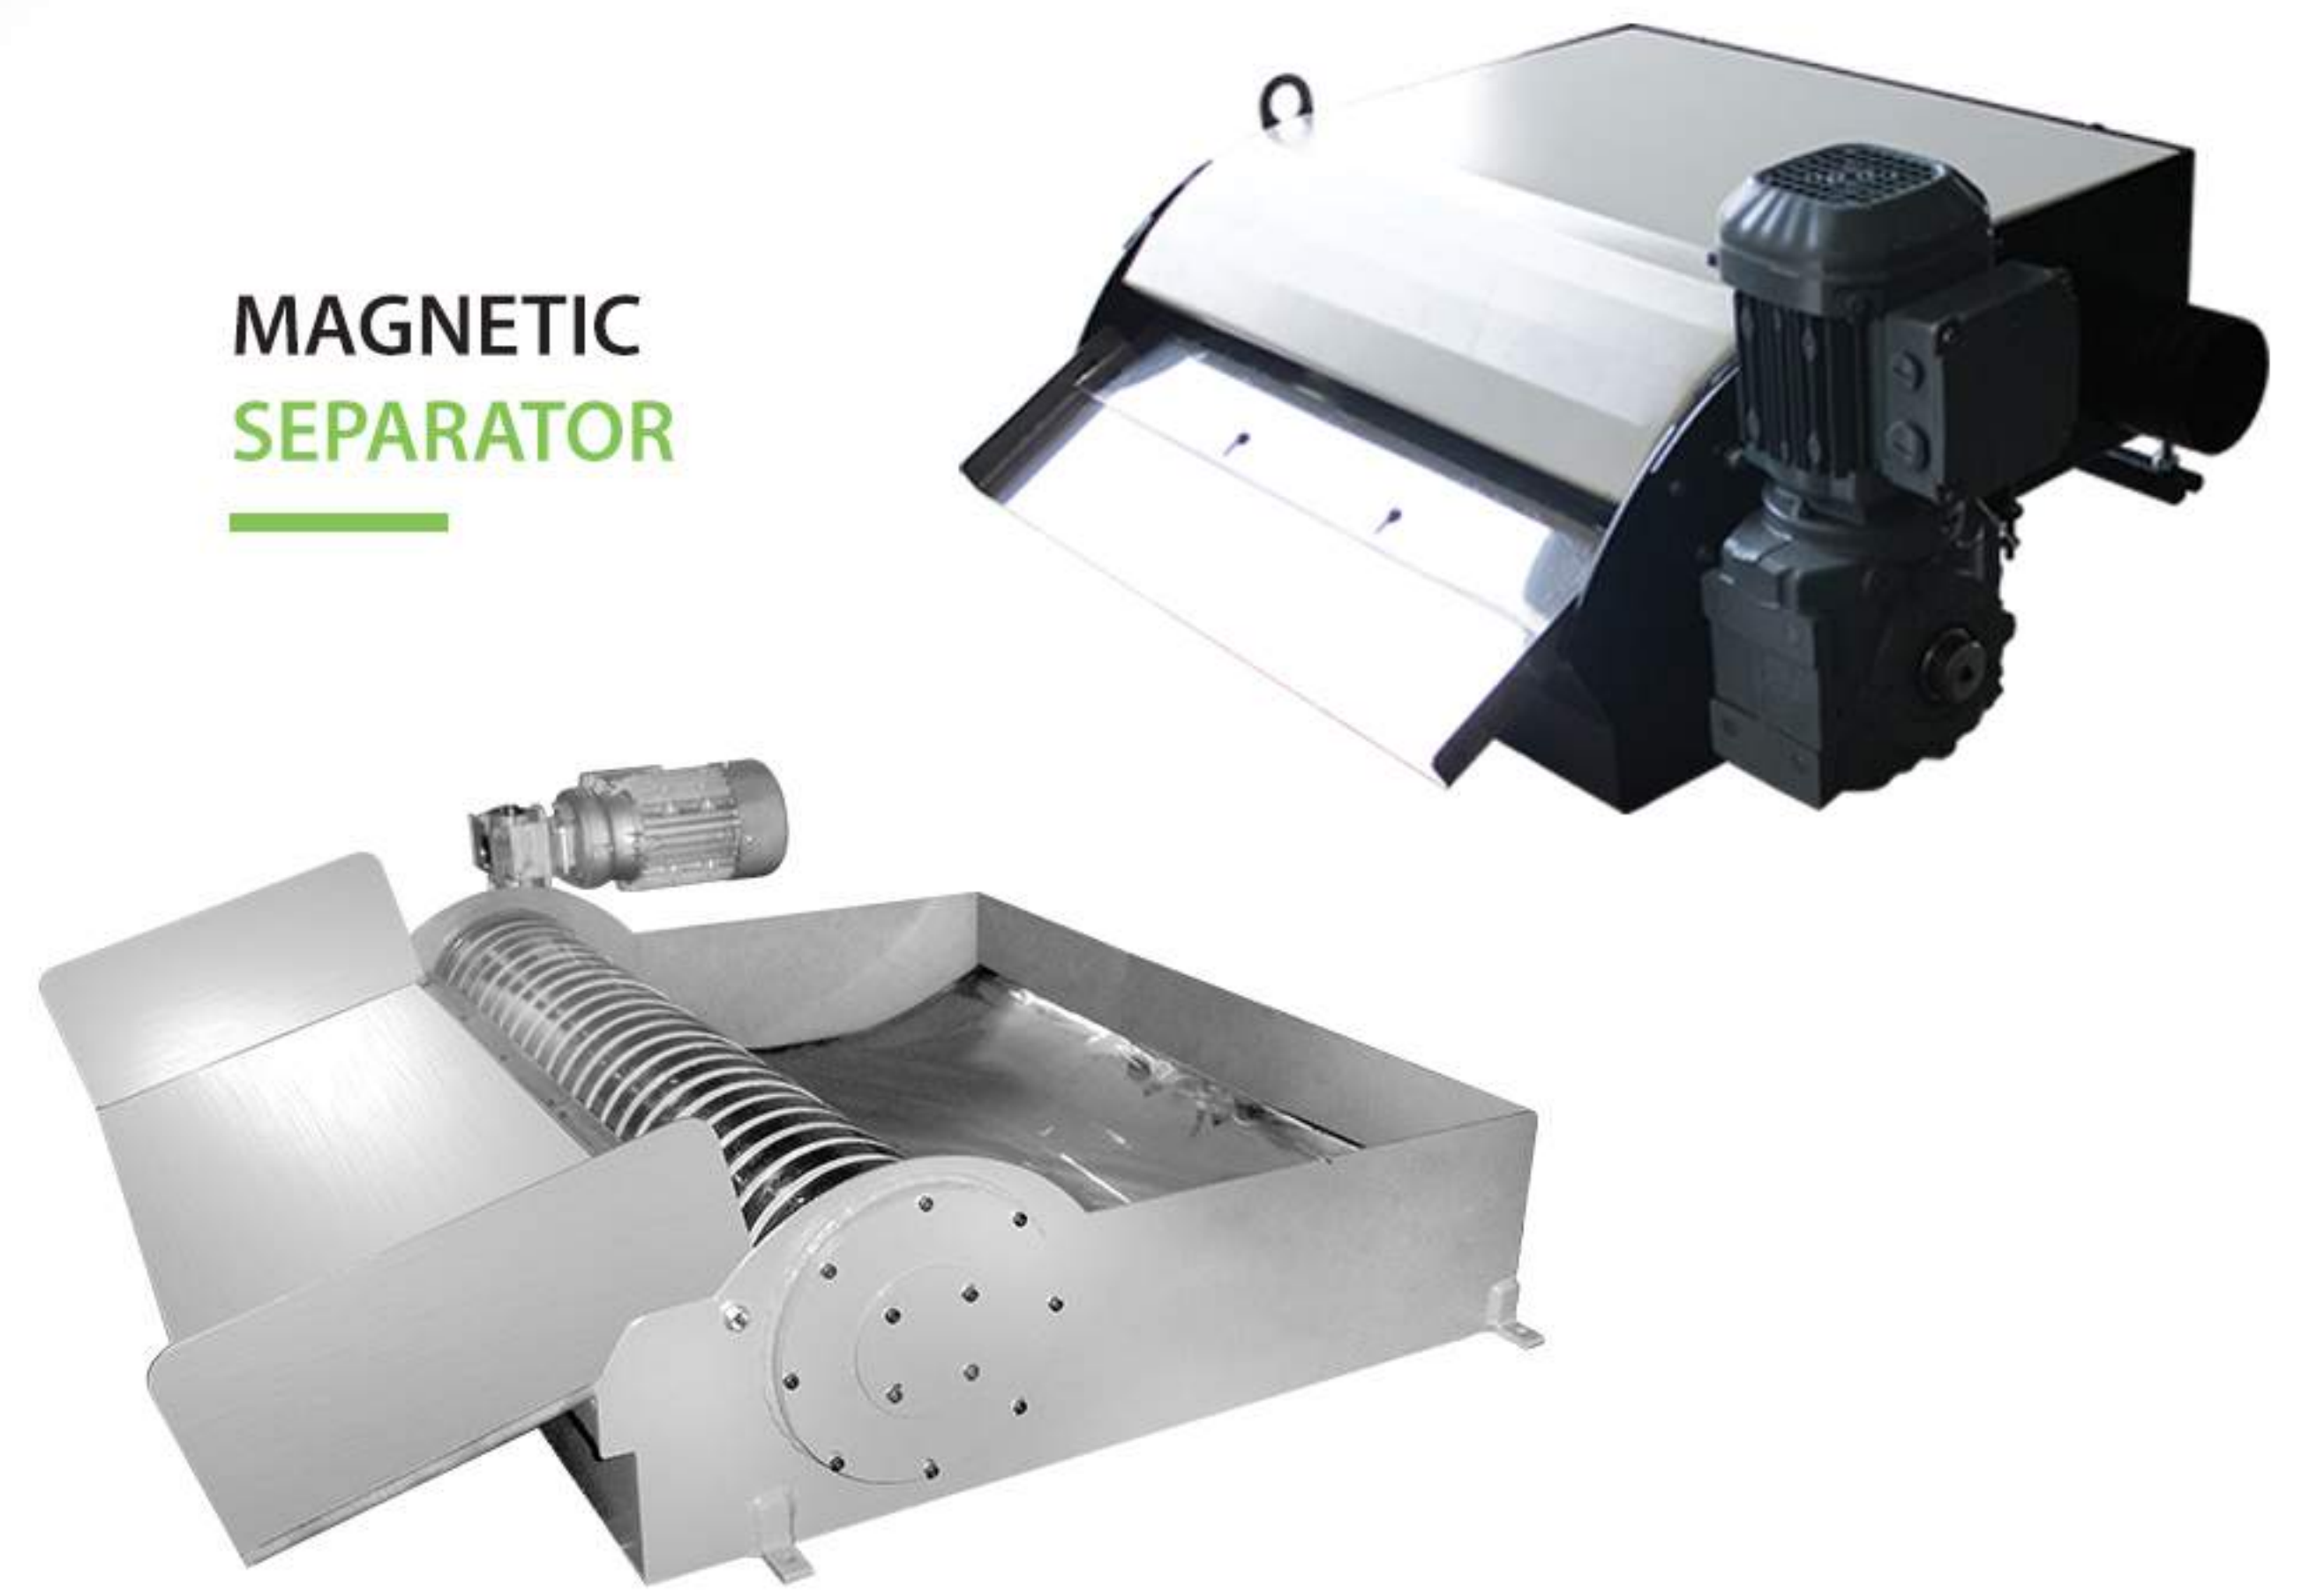

**GRAVITY  
FLAT FILTER**

**HIGH-PRESSURE  
COOLING SYSTEM  
SKIMMER**  
MAGNETIC SEPARATOR  
GRAVITY FLAT FILTER  
MICRONIC FILTER

**MAGNETIC  
SEPARATOR**

## FILTRATION SYSTEMS

Used to remove impurities generated in the machining process, prolonging the life of the coolant oil and cutting tools, keeping the machine clean.

**ROTATING  
GRAVITY FILTER**

**SKIMMER**

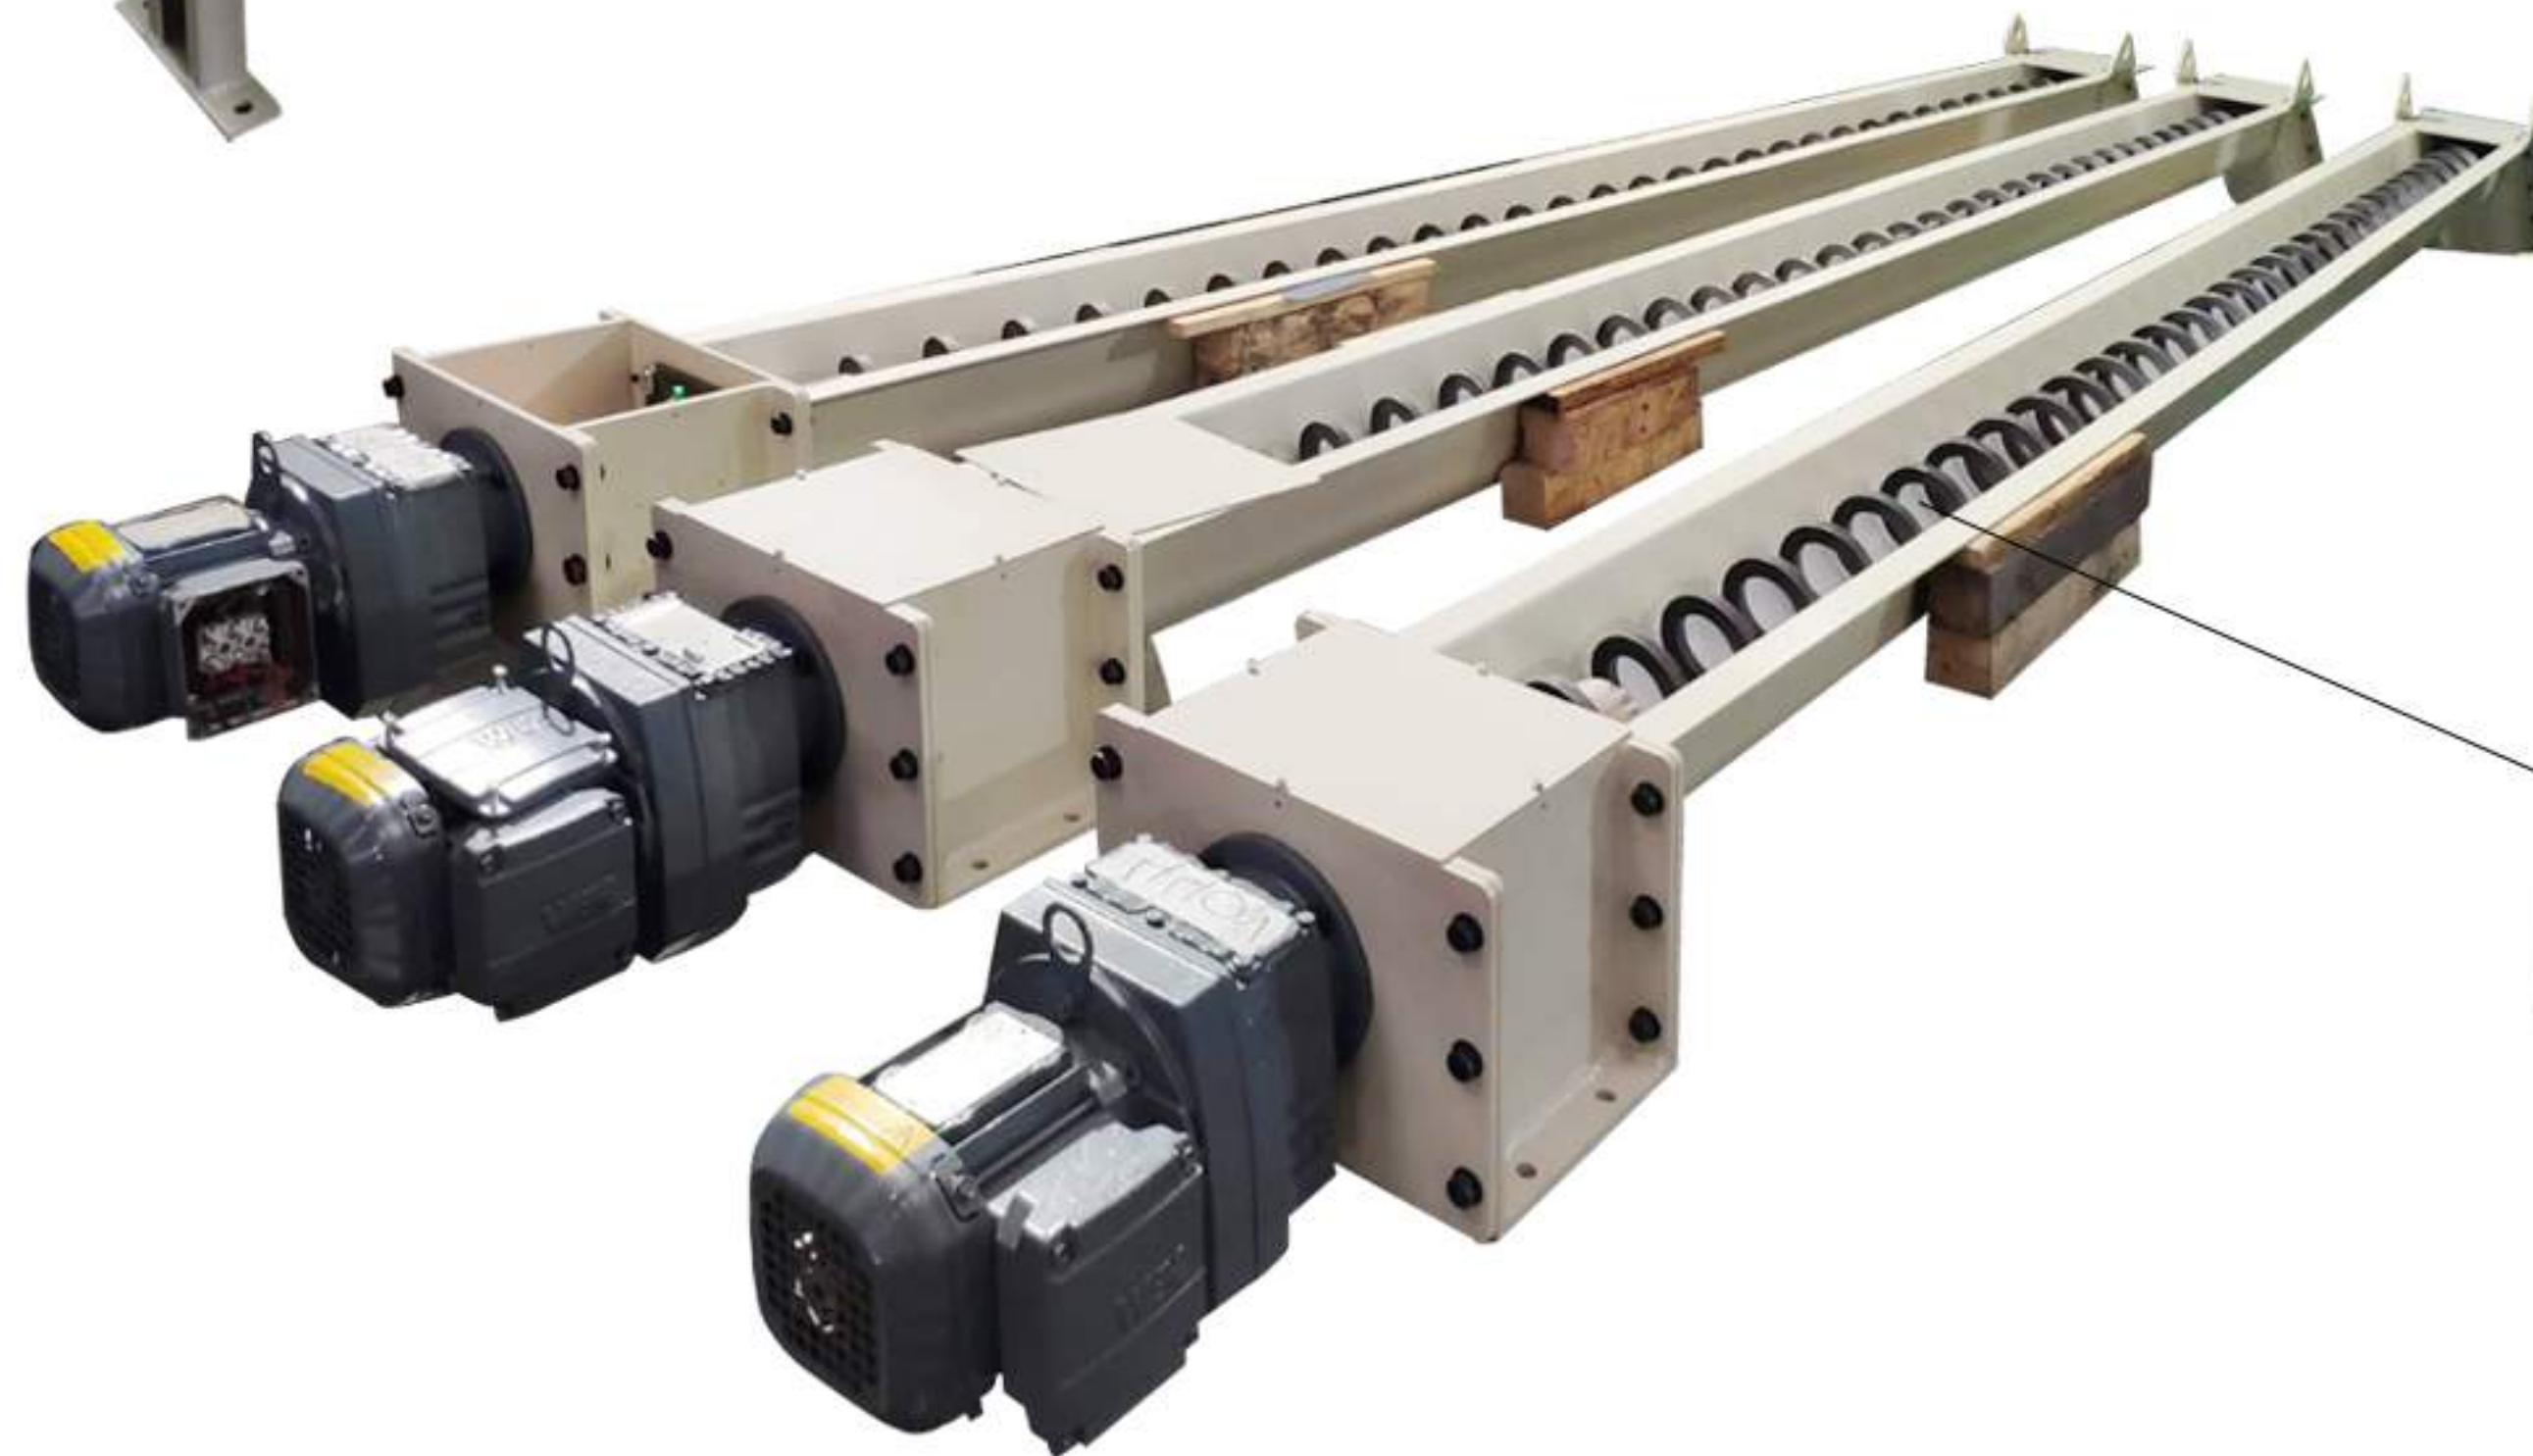

**ROLLER  
CONVEYOR**

**ROLLERS**

**SCREW  
CONVEYOR**

## ROLLER CONVEYOR

They are conveyor systems made up of cylindrical rollers mounted on a frame, facilitating the continuous movement of loads in various industrial environments. They can be driven by motors or operate gravitationally, adapting to transportation needs. They are widely used for their efficiency, reduction in labor and precision in transporting loads.

**FLEXIBLE  
DUCTS**

## FLEXIBLE DUCTS

They are versatile components in ventilation and fluid distribution systems, made from materials such as PVC or rubber, allowing air or liquids to pass through spaces that are difficult to access. Their flexibility makes them easy to install and they are used in a variety of residential, commercial and industrial environments for the efficient conduction of air, gases or liquids.

**TROMBA DE  
CARREGAMENTO**

# TECHNOLOGY AND COMMITMENT TO QUALITY!

**We are also FW Service** and we carry out preventive and corrective maintenance services on the entire range of products, whether from national or international manufacturers, as well as on-site repairs, assemblies, repairs and refurbishments.

Our team is ready to develop customized projects for clients all over the world and develop projects tailored to your needs.

*Request a visit from our technical representatives throughout the country.*
